

900 Miniatures of the Blackmar-Diemer Gambit

Eduardo Piza

This book presents 900 miniatures of the *Blackmar-Diemer Gambit*, with its attacks, counter gambits, counterattacks, retreats, traps, variations, and defenses. The 900 miniatures were carefully selected and classified. We have selected the 450 best miniatures from Bill Wall's book, "*500 Blackmar-Diemer Gambit Miniatures*," and added another 450 new miniatures, primarily from various online chess platforms.

All the games were analyzed using a minimalist approach, highlighting the correct moves when mistakes or inaccuracies were made by the players. The work is divided into four parts, comprising a total of 105 sections.

Each game included is accompanied by a graphic and a QR code, which allows the reader to be easily transferred to the Chess.com platform, where the game is located and can be viewed and analyzed through a mobile device. This book is the companion of the other book of the author, "*Blackmar-Diemer Gambit Revisited*."

About the author: Eduardo Piza is a Costa Rican chess player and mathematician. He was national chess champion in 1982.
